

Whisper-Quiet Casters

Ideal for noise-sensitive environments such as hospitals, schools, offices, warehouses, libraries, restaurants, theaters, auditoriums, laboratories, government institutions, factories, etc.

Silent fully-enclosed bearings allow for quiet night usage as well as day.

Full double-ball raceway, hardened to resist wear

New to the North American market, these professional grade casters are used in a variety of industries in Japan and Asia.

Precision bearings

Non-marking rubber, superior durometer hardness rating. Nansin began as rubber manufacturer in 1932, and has since used its advanced rubber technology in high-quality caster and wheel production.

Superior rolling start resistance, designed to move loads with less effort. Equipment is easier to handle and more responsive.

Wheel Diameter
4"

Load capacity
130 lbs. per casters

DSK-101

The DSK-101 uses 2 swivel casters (shown here) on the front of the dolly and 2 rigid casters on the back of the dolly (not shown).
